The increased output of silver depends mainly on the increased production of copper and lead ores. All with a better grade of ore than for

Toda Basin the Oro Pinta mill is un der construction. The new owners of the Southern Belle mine, in Pinal county, have ordered a 100-ton mill. The Huelinti mine, on Santa Crizariver, in Santa Criza county, was reently equipped with a tube milliant cyanide plant. Large bodies of low grade ore are reported to exist in this mine. The Congress mine and mill, in Yayapai county, were closed after being operated the first three months of 1511. At the Monica and Rincon gold mines preparations were made to operate. The Tiger mine and mill, near Crown King, were operated atradily, producing gold builton and lead concentrates. Grading was commenced for the cyanide mill on the Venezia mine, in Crook canyon. In Yuma county the Safford Lage mill, near Vicksburg, was in regular operation, and also the North Star, at Kofa.

According to the preliminary fig-ures prepared by the director of the min,t which do not include statistics of exports, the production of gold in Arizona in 1911 was valued at \$2. 954,799, and that of silver was 428 fine ounces, valued at \$876,937. Final figures for J910 gave for Arizona \$3,413,200 worth of gold and ine ounces of silver, valued at \$1,434,100.

An Estimate For House Wiring Costs Nothing

Our representative will call if you telephone number ONE-NINE-SEVEN and make a request.

He will give you an exact estimate of the expense necessary to wire your house complete for the use of electricity, and will explain the relative cost to operate the different types of incandescent lamps now available.

Do not hesitate to ask for figures-no harm done if you do not order the work done.

If a consumer of electricity you need be to no expense for lamps, since we give 4, 8, 16 or 32 candle power carbon filament lamps in exchange for old lamps.
